TIDE – Template-Designed Organic Electronics
Research Training Group

February 17, 2026

Dear Members of the TIDE Research Training Group,

I am writing to express my keen interest in joining the TIDE – Template-Designed Organic Electronics research training group. Having successfully completed my Bachelor's degree in Chemistry at the Rheinische Friedrich-Wilhelms-Universität Bonn and currently pursuing my Master's degree in the same discipline, I am eager to advance my research career in the captivating field of organic electronics.

Through conversations with my office colleague, I have learned about TIDE's strong reputation and the interesting research being conducted there. I am especially interested in the regular seminars from specialists in their respective fields and the opportunity for interdisciplinary collaboration, as I believe working with researchers from different backgrounds leads to valuable new ideas.

Thank you for your consideration of my application.

Yours sincerely,

Lucas Hirschfeld
